RE: Sanitarian in Training (SIT) applicants working prior to becoming licensed.

To all Health Departments and County Commissioners:

The Board of Sanitarians (board) recently discussed the issue of Sanitarian in Training (SIT) applicants performing work that requires an SIT license before actually obtaining licensure through the board. The board is concerned that these SIT applicants may be working for weeks or months before completing application/licensure with the board.

The board directed me to send this correspondence to remind you that *all individuals must complete the application process and actually receive a license from the board prior to performing work that requires a license.*

The board and office staff are committed to assisting SIT and SAN applicants through the application and licensure process in any way that we can. Anyone in need of help with this process is encouraged to contact me at the board office anytime.

Thank you,

Chris Bernet
